

Precious Adeoye

Backend Developer

📞 2348145771521 ✉ contact.preciousadeoye@gmail.com 📍 Lagos, Nigeria

Professional Summary

Motivated and detail-oriented backend developer with 6 months of hands-on experience in web development, specializing in C# (.NET), JavaScript (Node.js), and database management (MySQL, MongoDB). Proficient in building RESTful APIs, implementing MVC architecture using ASP.NET Core, and managing version control with Git and GitHub. Passionate about writing clean, maintainable, and scalable code while ensuring efficient system performance. Strong problem-solving abilities with a collaborative mindset, eager to learn and adapt to new technologies in a fast-paced environment.

Work Experience

Junior Software Developer at PORA TECH

Sep 2024 - Feb 2025

Collaborated with a team of developers to design, develop, and maintain web applications using JavaScript, HTML5, and CSS3. - Developed server-side applications using Node.js and Express.js, ensuring efficient data handling and API integration. - Utilized MongoDB for database management, including schema design and querying, to support application data storage needs. - Managed version control and code repositories using Git and GitHub, contributing to collaborative projects and code reviews. - Participated in Agile ceremony meetings, contributing ideas and feedback to enhance team collaboration and project outcomes. - Implemented responsive design techniques to ensure application functionality across various devices and screen sizes.

C# Backend Developer Intern at Nupat_Technologies

Jan 2025 - Present

* Learning and implementing C# syntax, object-oriented programming (OOP), and best practices. * Working with MySQL for database management, writing queries, and handling CRUD operations. * Developing web applications using ASP.NET Core MVC, following the MVC design pattern. * Building RESTful APIs to handle data requests and responses efficiently. * Debugging and troubleshooting backend issues in C# applications. *Collaborating on projects and version control using Git.

Education

Bachelor of Science in Transport logistics management

Nigeria Maritime University | Aug 2021 - Oct 2024

Certifications

- IBM BACK-END JAVASCRIPT DEVELOPER
-

Skills

Node.js

GitHub Development Tools: Visual Studio

Express.js Databases: MySQL

Postman Technologies & Concepts: RESTful APIs

CSS Frameworks & Libraries: ASP.NET Core MVC

Visual Studio Code

HTML

MVC Architecture

MongoDB Version Control: Git

Agile Methodologies

Languages: C#

JavaScript

Object-Oriented Programming (OOP)

Responsive Web Design

Projects & Awards

- Created a system for recording student details including name course of study gender and program duration. It was developed using C#.
- Developed a web application that allows users to resell unwanted household items. The platform enables buyers to find affordable second-hand goods. It was built using MongoDB database and Node.js with React for the frontend
- Designed and implemented a platform that enables restaurants to list their meals and allows customers to order directly from vendors. The system utilized RESTful APIs with Node.js and MongoDB
